—Many will be pleased to learn that Mr. J. H. Miles is able to work again and that his health is rapidly improving since he underwent a serious and painful surgical operation a short time since in Chicago, and since madam rumor has done Mr. and Mrs. Miles a great injustice in circulating the report that he and his wife had separated and given their child away, we hasten to correct the error by stating that Mr. Miles informs us that it is all false and it was only on account of the severe sickness of both that they discontinued house-keeping for the present and their boy went to live with a relative near by for the summer while he and his wife were being treated and recover from their sickness.

OFF FOR EUROPE — T. C. Richardson, John Miles, W. H. Wood and Dr. C. M. Smith, are planing for a trip to the old country, for a couple of months, wanting to sail on the 11 prox. ERECT NEW BUILDINGS ON JOB MILES FARM

Job Miles, on his place west of Evansville is just now rushing a gang of carpenters in the finishing of a large log house, 24 x 30 with a cement floor which will have room for ten breeding pens and when the partitions are lifted will accommodate about sixty fattening hogs. Besides this improvement he is also adding a large extension to his poultry house which will give ample accommodation to his large flock of hens.

Mr. Miles is one of the oldest breeders of Poland-China hogs in this locality and in the past has bred some boars which have headed the herds of several prominent breeders in this and adjoining counties. Though on account of shortness of help, Mr. Miles is not breeding hogs on as large a scale as he used to, he is still keeping up the quality and his registry records, and has a few mighty classy young boars and gilts which he expects to sell from the farm, not going to the trouble and expense of a sale.

Mr. Miles is justifiably proud of his thirty head of pure bred Holsteins some of which have fine milk records, he having a record of one cow which last year during the month of February made a record of sixty-pounds of malk a day, for the entire month, on two feeds a day.
